" A timely and smart discussion of how different cities and regions have made a changing economy work for them – and how policymakers can learn from that to lift the circumstances of working Americans everywhere. " —Barack Obama We ' re used to thinking of the United States in opposing terms: red versus blue, haves versus have-nots. But today there are three Americas. At one extreme are the brain hubs—cities like San Francisco, Boston, and Durham—with workers who are among the most productive, creative, and best paid on the planet. At the other extreme are former manufacturing capitals, which are rapidly losing jobs and residents. The rest of America could go either way. For the past thirty years, the three Americas have been growing apart at an accelerating rate. This divergence is one the most important developments in the history of the United States and is reshaping the very fabric of our society, affecting all aspects of our lives, from health and education to family stability and political engagement. But the winners and losers aren ' t necessarily who you ' d expect. Enrico Moretti ' s groundbreaking research shows that you don ' t have to be a scientist or an engineer to thrive in one of the brain hubs. Carpenters, taxi-drivers, teachers, nurses, and other local service jobs are created at a ratio of five-to-one in the brain hubs, raising salaries and standard of living for all. Dealing with this split—supporting growth in the hubs while arresting the decline elsewhere—is the challenge of the century, and The New Geography of Jobs lights the way.

Concise, career focused, and completely up to date, the exciting new CRIMINAL JUSTICE IN ACTION: THE CORE, 8th Edition, delivers an accessible, applied, and real-world introduction to the field. Gripping photos and an engaging magazine-like layout make this succinct text ideal for a fast-paced course and visual learners. The text presents topics and cases straight from today's headlines, putting students in the center of the action with vivid, relatable examples that demonstrate the core principles of the American justice system at work. Reflecting reviewer feedback, the text combines just the right depth of coverage with a wealth of learning tools that appeal to a variety of learning styles. Why has democracy failed to reduce corruption in Kenya? Framing the challenge in game theoretical terms, Dominic Burbidge examines how mutual expectations between citizens dictate the success or failure of political reforms. Since 1992, Kenya has conducted multiparty elections with the hope of promoting accountability and transparency in government. This is being undermined by ongoing corruption and an increasingly centralised state response to terrorism. Providing a nuanced assessment of democracy ' s difficult road in Kenya, Burbidge discusses the independent role being played by widespread social expectations of corruption. Through tracking average views of the average person, it is possible to identify a threshold beyond which society suffers mutually reinforcing negative social expectations. This trend is the shadow of Kenyan democracy, and must be treated as a policy challenge on its own terms before institutional reforms will be successful.

Gecekondu settlements-or shanty towns-in large Turkish cities are mostly populated by low-income families, many of which have migrated from the villages of Central Anatolia. The rise of the Islamist party AKP in the 1990s and 2000s had a large impact on how these gecekondus are examined, and how they are perceived to reflect key issues at play in Turkish society: welfare, local identity, religious communities and the rise of civil society. Having lived in one of these neighbourhoods in Ankara, Burcu ?enturk's book sheds light on the experience of gecekondu dwelling in Turkey. By focusing on this aspect, she brings to the fore issues such as urbanisation, modernisation and development, as well as examining the impact these kinds of phenomena have on generation gaps and the role of women in Turkish society. By using the framework of the experience of three generations of gecekondu dwellers, ?enturk is able to chart the emergence, development and the gradual breakdown of social relations, and how the dynamics of these have changed during the course of the latter half of the twentieth century."

Data sharing can accelerate new discoveries by avoiding duplicative trials, stimulating new ideas for research, and enabling the maximal scientific knowledge and benefits to be gained from the efforts of clinical trial participants and investigators. At the same time, sharing clinical trial data presents risks, burdens, and challenges. These include the need to protect the privacy and honor the consent of clinical trial participants; safeguard the legitimate economic interests of sponsors; and guard against invalid secondary analyses, which could undermine trust in clinical trials or otherwise harm public health. Sharing Clinical Trial Data presents activities and strategies for the responsible sharing of clinical trial data. With the goal of increasing scientific knowledge to lead to better therapies for patients, this book identifies guiding principles and makes recommendations to maximize the benefits and minimize risks. This report offers guidance on the types of clinical trial data available at different points in the process, the points in the process at which each type of data should be shared, methods for sharing data, what groups should have access to data, and future knowledge and infrastructure needs. Responsible sharing of clinical trial data will allow other investigators to replicate published findings and carry out additional analyses, strengthen the evidence base for regulatory and clinical decisions, and increase the scientific knowledge gained from investments by the funders of clinical trials. The recommendations of Sharing Clinical Trial Data will be useful both now and well into the future as improved sharing of data leads to a stronger evidence base for treatment. This book will be of interest to stakeholders across the spectrum of research--from funders, to researchers, to journals, to physicians, and ultimately, to patients.

As riveting and current as today's headlines, CRIMINAL JUSTICE IN ACTION, Ninth Edition, is designed with today's busy students and instructors in mind. Concepts make sense to students, thanks to vivid straight-from-the-headlines vignettes at the beginning of every chapter and plentiful real-world examples throughout the book. Choosing what's important to remember is a snap with each chapter's numbered objectives, which are reinforced throughout the chapter as well as in the book's supplementary items. Thinking critically and writing become less intimidating for students with the guidance of practical writing activities. Reviewers praise the book's crisp, clear topic coverage as well as its engaging magazine-style design and captivating writing, which combine to draw students into the material. And, with this edition's expanded coverage of ethics, policy, and discretion, students gain a panoramic view of key criminal justice issues that goes far beyond learning facts and the law. In The Place with No Edge, Adam Mandelman follows three centuries of human efforts to inhabit and control the lower Mississippi River delta, the vast watery flatlands spreading across much of southern Louisiana. He finds that people ' s use of technology to tame unruly nature in the region has produced interdependence with—rather than independence from—the environment. Created over millennia by deposits of silt and sand, the Mississippi River delta is one of the most dynamic landscapes in North America. From the eighteenth-century establishment of the first French fort below New Orleans to the creation of Louisiana ' s Coastal Master Plan in the 2000s, people have attempted to harness and master this landscape through technology. Mandelman examines six specific interventions employed in the delta over time: levees, rice flumes, pullboats, geophysical surveys, dredgers, and petroleum cracking. He demonstrates that even as people seemed to gain control over the environment, they grew more deeply intertwined with—and vulnerable to—it. The greatest folly, Mandelman argues, is to believe that technology affords mastery. Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected, but both emerged from the same fantasy of harnessing nature to technology. Similarly, the levee system ' s failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming ' s rising seas and strengthening storms. The Place with No Edge advocates for a deeper understanding of humans ' relationship with nature. It provides compelling evidence that altering the environment—whether to make it habitable, profitable, or navigable —inevitably brings a response, sometimes with unanticipated consequences. Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible, respectful ways.

This book addresses the discursive importance of the prosecution ' s opening statement before an international criminal tribunal. Opening statements are considered to be largely irrelevant to the official legal proceedings but are simultaneously deployed to frame important historical events. They are widely cited in international media as well as academic texts; yet have been ignored by legal scholars as objects of study in their own right. This book aims to remedy this neglect, by analysing the narrative that is articulated in the opening statements of different prosecutors at

different tribunals in different times. It takes an interdisciplinary approach and looks at the meaning of the opening narrative beyond its function in the legal process in a strict sense, discussing the ways in which the trial is situated in time and space and how it portrays the main characters. It shows how perpetrators and victims, places and histories, are juridified in a narrative that, whilst purporting to legitimise the trial, the tribunal and international criminal law itself, is beset with tensions and contradictions. Providing an original perspective on the operation of international criminal law, this book will be of considerable interest to those working in this area, as well as those with relevant interests in International/Transnational Law more generally, Critical Legal Studies, Law and Literature, Socio-Legal Studies, Law and Geography and International Relations.

Media and communication advancements allow individuals across the globe to connect in the blink of an eye. Individuals can share information and collaborate on new projects like never before while also remaining informed on global issues through ever-improving media outlets and technologies. *Advanced Methodologies and Technologies in Media and Communications* provides emerging research on the modern effects of media on cultures, individuals, and groups. While highlighting a range of topics such as social media use and marketing, media influence, and communication technology, this book explores how these advancements shape and further the global society. This book is an important resource for media researchers and professionals, academics, students, and communications experts seeking new information on the effective use of modern technology in communication applications.
