Research into the manufacture of lightweight automobiles is driven by the need to reduce fuel consumption to preserve dwindling hydrocarbon resources without compromising other attributes such as safety, performance, recyclability and cost. Materials, design and manufacturing for lightweight vehicles will make it easier for engineers to not only learn about the materials being considered for lightweight automobiles, but also to compare their characteristics and properties. Part one discusses materials for lightweight automotive structures with chapters on advanced steels for lightweight automotive structures, aluminium alloys, magnesium alloys for lightweight powertrains and automotive structures, thermoplastics and thermoplastic matrix composites and thermoset matrix composites for lightweight automotive structures. Part two reviews manufacturing and design of lightweight automotive structures covering topics such as manufacturing processes for light alloys, joining for lightweight vehicles, recycling and lifecycle issues and crashworthiness design for lightweight vehicles. With its distinguished editor and renowned team of contributors, Materials, design and manufacturing for lightweight vehicles is a standard reference for practicing engineers involved in the design and material selection for motor vehicle bodies and components as well as material scientists, environmental scientists, policy makers, car companies and automotive component manufacturers. Provides a comprehensive analysis of the materials being used for the manufacture of lightweight vehicles whilst comparing characteristics and properties Examines crashworthiness design issues for lightweight vehicles and further emphasises the development of lightweight vehicles without compromising safety considerations and performance Explores the manufacturing process for light alloys including metal forming processes for automotive applications

Zwei Ereignisse, die Europa und die OSZE 2014 besonders geprägt und das Interesse an der Organisation schlagartig erhöht haben, stehen im Mittelpunkt der Expertenanalysen und Insiderberichte im nunmehr 20. Band der Reihe: die Ukrainekrise und der Helsinki+40-Prozess. Die diesjährigen Länderberichte sind Turkmenistan, dem OSZE-"Neuling" Mongolei und Großbritannien im Kontext des schottischen Unabhängigkeitsreferendums gewidmet. Im Kapitel über Konfliktprävention und Streitschlichtung werden die Chancen und Herausforderungen, die mit der Einsetzung der OSZE-Sonderbeobachtermission in der Ukraine verbunden sind, Hintergründe und Auswirkungen des Konflikts, die Motive Russlands und die Entwicklungen in der ukrainischen Zivilgesellschaft von internationalen Experten untersucht. Weitere Themen sind u.a. der Konflikt um Berg-Karabach, Russlands Kritik an der Wahlbeobachtung des BDIMR, konventionelle Rüstungskontrolle vor dem Hintergrund der Ukrainekrise sowie die Mittelmeerkooperation der OSZE vier Jahre nach Beginn des "Arabischen Frühlings". Wie stets bietet das Jahrbuch in einem umfassenden Anhang Daten und Fakten zu den 57 Teilnehmerstaaten der OSZE, einen Überblick über wichtige Veranstaltungen sowie eine aktuelle Literaturauswahl. In englischer Sprache.

The OSCE Yearbook 2009 contains contributions written by leading European security experts on such topics as: the possibility that Europe needs a "new security architecture," the future of detente, Russian President Medvedev's initiative for a European Security Treaty, the Corfu Process, and the implications of US foreign policy in the post-Bush era for Europe. The participating States that take focus this year are Ukraine, Lithuania, and Belarus, together with past and future Chairmanship-holders Finland and Kazakhstan. The OSCE conflict prevention and dispute settlement activities that are examined include the prospects for conflict resolution in Moldova, the role of the mission in Kosovo, the military aspects of the OSCE mission to Bosnia and Herzegovina, the OSCE Center in Astana, and the prospects for conflict settlement in Nagorno-Karabakh. The contributions also include an in-depth consideration of the OSCE's election observation activities and an informed legal discussion of de facto regimes and human rights. As well, the book discusses the problems facing human rights defenders, the contradictions in international police reform, the OSCE's approach to border security and management, and the legacy of Professor Victor Yves Ghebali, who died this year.
