This compendium of 29 chapters from 18 countries contains both fundamental and advanced insight into the inevitable shift from cities dominated by the fossil-fuel systems of the industrial age to a renewable-energy based urban development framework. The cross-disciplinary handbook covers a range of diverse yet relevant topics, including: carbon emissions policy and practice; the role of embodied energy; urban thermal performance planning; building efficiency services; energy poverty alleviation efforts; renewable community support networks; aspects of household level bio-fuel markets; urban renewable energy legislation, programs and incentives; innovations in individual transport systems; global urban mobility trends; implications of intelligent energy networks and distributed energy supply and storage; and the case for new regional monetary systems and lifestyles. Presented are practical and principled aspects of technology, economics, design, culture and society, presenting perspectives that are both local and international in scope and relevance.

A crisp and sparkling blend of cognitive science and human behavior that offers meaningful and attainable pathways towards becoming our best selves. Why do we feel like in order to be productive, happy, or good, we must sacrifice everything else? Is it possible to feel all three at once? Without even knowing it, we're doing things everyday to sabotage ourselves and our societies, habits that prevent us from optimizing long term happiness. Where most books imagine solutions that, when enacted, fail to fundamentally improve our lives, Jim Davies grounds his research in cognitive science to show you not only what works, but how much it works. Being the Person Your Dog Thinks You Are shows us how we can use science to become our best selves, using resources we already have within our own brains. Davies's book challenges and inspires us to approach the big picture while also staying mindful of the everyday details in real life. Davies proves why multitasking is bad for you, when a little unmindfulness can be good for you, how to best justify which charities to donate to, and how to hack your brain. The most surprising truth Davies offers us spreads across these pages like wildfire: you too can lead an optimally good life, not through uprooting your life from the ground up, but from adapting your mentality to your given present. A better life doesn't need to look like a massive change-like our beloved dogs who already view us as our best selves, it's already much closer than you think.

Considering the future of European integration, this clear and compelling study explores the interplay between collective action and democracy in the European Union. Richard Balme and Didier Chabanet convincingly show that as support for broadening and deepening integration has waned, contentious and powerful social movements have flourished. The authors analyze the relationship among interest group politics, social movements, and public policy at the EU level though a wealth of case studies on regional policy, unemployment and poverty, women's rights, migration policy, and environmental protection. An essential primer on European democracy, this study will be invaluable for scholars and students in European politics and public policy, globalization and democracy, and comparative social movements.
