The Cessna 337 Skymaster, arguably the most commercially successful push-pull attempt, at least in terms of numbers built. And although the 337 Skymaster isn't the most popular twin ever marketed, it's done all right for itself and has achieved its primary goal: eliminating asymmetric thrust and simplifying the pilot's workload in the event of an engine out.

~~Cessna Skymaster - AVweb~~

The Cessna Pilots Operating Handbook and FAA Approved Airplane Flight Manual consistently states to "Feel for Detent" throughout the preflight, normal, amplified, and emergency procedures sections of the POH/AFM. Additionally, the various service and maintenance manuals require operational checks, which include a "feel for the detents",

MT-Propeller has received an FAA STC for its next generation four-blade scimitar composite propeller on the Cessna T303 Crusader powered by TCM (L)TSIO-520-AE engines. The installation is already STC'd by EASA. According to MT-Propeller President Gerd Muehlbauer, the installation features:

A Flight Information Manual for the Cessna 152, for use when learning to fly on the C152 or during type rating training, and a great reference manual for pilots who fly the aircraft. Compiled from engineering manuals, manufacturers handbooks, and the author's personal in depth flight experience. Provides straight forward, useful explanations of the aircraft, systems and flight operations including performance planning, with photographs, diagrams and schematics.

The Aviation Instructor's Handbook is a world-class educational reference tool developed and designed for ground instructors, flight instructors, and aviation maintenance instructors. This information-packed handbook provides the foundation for beginning instructors to understand and apply the fundamentals of instructing. It also provides aviation instructors with detailed, up-to-date information on learning and teaching, and how to relate this information to the task of

conveying aeronautical knowledge and skills to students. Experienced aviation instructors will also find the new and updated information useful for improving their effectiveness in training activities. No aviation instructor's library is complete without the up-to-date Aviation Instructor's Handbook.

Close look at the critical part of the instrument rated pilot's life and ongoing training.

Flight Discipline is the complete tool kit for any aviator, whether military, commercial, or recreational, to develop the crack discipline needed to be a safe and effective aviator. Major Tony Kern analyses the causes of poor flight discipline, gives chilling case studies of the consequences, and lays out a plan for individual improvement. Key words are italicized and review questions included for each chapter. An unequalled guide to this mainspring of good piloting.

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

When he became a commercial pilot at age nineteen, Bill Grenier never imagined that one day he'd be captain of the largest commercial plane the world had seen, flying the highest profile routes of a proud national carrier. Even less could he have imagined, at age nineteen and with barely a penny to his name, that he'd one day be a wealthy man. But he would ultimately control an empire worth nearly a billion dollars. With liberal doses of wit and humour, *Miles to Millions* shows what a little luck, lots of perseverance, and an appetite for adventure can do. From boarding house to boardroom, from cradle to cockpit, Grenier offers a fascinating story of success both as a commercial pilot and as a businessman. Filled with anecdotes you'd never expect from a single career from acting as repo man taking planes for payment to saving hundreds of passengers in a stricken 747 with a collapsed co-pilot *Miles to Millions* is a high-flier of a story bound to entertain both aviation experts and enthusiasts alike.

**CHECKLISTS & COMPLIANCE** Do it or don't fly. Read and learn: \*Why highly skilled, highly proficient pilots make tragic errors \*Reasons that pilots too often take off without fuel \*How to avoid a myriad of mishaps and accidents resulting from inadequate attention to protocols and details \*Why gear-up landings are a recurring pattern, despite safeguards \*How to beat the most common causes of takeoff and landing misconfigurations \*Ways to build good piloting habits and keep them strong \*Real-life pilot near-miss stories you won't forget **FAST & FOCUSED RX FOR PILOT ERROR** The most effective aviation safety tools available,
