Adopters and reviewers praise Intermediate Accounting, 4e, by Spiceland/Sepe/Tomassini for its superior readability, strong supplements package/learning system, good EOC, real-world flavor, consistent quality; and high student engagement. SST 4e will gain support in both traditional and progressive accounting departments, especially those looking for a more concise, decision-making text that reinforces challenging concepts. The authors have created a flexible text with a student friendly writing style that focuses on explaining not only how to apply a procedure, but why it's applied. SST 4e is built around a "Learning System" designed to prepare students for the new CPA exam and the business world, by emphasizing decision making. Acknowledging the diversity of students and their learning styles, the authors have created a clear text and varied supplemental materials to aid the success of every student. SST 4e also provides a flexible and consistent supplemental package for instructors.

Designed for the one- to two-semester Business/Applied Calculus course that commonly requires the use of graphing utilities and spreadsheets, Calculus Concepts takes an applications-based approach that involves modeling, the use and interpretation of real-world data, and the use of technology. The text helps build bridges between the mathematics of calculus and the real-world concepts students will face in their future careers. Students use real data and graphing technology to build their own models and interpret results. Concept Objectives present each chapter's goals in a chapter-opening list, divided into concepts and skills. Concept Inventories at the end of each section summarize the key concepts and skills developed within that section. Concept Checklists at the end of each chapter summarize the main concepts and skills taught in the chapter. Concept Review/Chapter Tests at the end of each chapter provide more practice with techniques and concepts. Answers to these tests are included in the answer key at the back of the text. Technology Guides for Excel and Graphing Calculators show students how to solve certain examples in the text using their particular technology. The manuals include instructions for the TI-83, TI-86, and TI-89 calculators as well as for Excel. Sections of the manuals are referenced in the text by a technology icon.

Connect students in grades 7 and up with science using Science Tutor: Chemistry. This effective 48-page resource provides additional concept reinforcement for students who struggle in chemistry. Each lesson in this book contains an Absorb section to instruct and simplify concepts and an Apply section to help students grasp concepts on their own. The book covers topics such as matter, physical and chemical changes, mixtures and solutions, the periodic table, atomic structure, and radioactivity. It is great for use in the classroom and at home!

In *Managing Change in Organizations*, Stefan Sveningsson and Nadja Sörgärde explore a broad range of perspectives on change management, encouraging critical reflection and making sense of a complex field of theories. Their unique approach based around three key perspectives of change will help students understand: How change is accomplished – the tool perspective What change means for those involved – the process perspective And Why is change initiated (and is it necessary) – the critical perspective This focus on the common how, what and why questions offers students the chance to learn pragmatic tools for managing change, as well as gain an in-depth understanding of different theories and their value. The book is complemented by a range of online resources including PowerPoint Slides, Multiple Choice Questions, and a selection of SAGE Business Cases and journal articles. Stefan Sveningsson is Professor of Business Administration at the School of Economics and Management, Lund University, Sweden. Nadja Sörgärde is a Senior Lecturer at the School of Economics and Management, Lund University, Sweden.

Offers advice on how to lead an organization into change, including establishing a sense of urgency, developing a vision and strategy, and generating short-term wins.

A basic guide to hospital billing and reimbursement, *Understanding Hospital Billing and Coding*, 3rd Edition helps you understand, complete, and submit the UB-04 claim form that is used for all Medicare and privately insured patients. It describes how hospitals are reimbursed for patient care and services, showing how the UB-04 claim form reflects the flow of patient data from the time of admission to the time of discharge. Written by coding expert Debra P. Ferenc, this book also ensures that you understand the essentials of ICD-10-CM and develop skills in both inpatient coding and outpatient/ambulatory surgery coding. UB-04 Claim Simulation on the companion Evolve website lets you practice entering information from source documents into the claim form. Over 300 illustrations and graphics bring important concepts to life. Detailed chapter objectives highlight what you are expected to learn. Key terms, acronyms, and abbreviations with definitions are included in each chapter. Concept Review boxes reinforce key concepts. Test Your Knowledge exercises reinforce lessons as you progress through the material. Chapter summaries review key concepts. Practice hospital cases let you apply concepts to real-life scenarios. UPDATED content reflects the most current industry changes in ICD-10, MR-DRGs, PPS Systems, and the Electronic Health Record. NEW Hospital Introduction chapter includes a department-by-department overview showing how today's hospitals really work NEW Health Care Payers and Reimbursement section follows the workflow of the hospital claim by including successive chapters on payers, prospect payment systems, and accounts receivable management.
