Writing an amazing college admission essay is easier than you think! So you're a high school senior given the task of writing a 650-word personal statement for your college application. Do you tell the story of your life, or a story from your life? Do you choose a single moment? If so, which one? The options seem endless. Lucky for you, they're not. College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. And all you have to do to figure out which type is best for you is answer two simple questions: 1. Have you experienced significant challenges in your life? 2. Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? Packed with tips, tricks, exercises, and sample essays from real students who got into their dream schools, College Essay Essentials is the only college essay guide to make this complicated process logical, simple, and (dare we say it?) a little bit fun.

"Contains 50 essays with analysis from successful Ivy League applicants, tips on how to select the best topic, what Ivy League admission officers want to see in your essay, 25 mistakes that guarantee failure and tips from Ivy League students on how to write a successful essay"--

Grads' Guide to Graduate Admissions Essays provides more than 50 successful admission essays straight from the source--recent college graduates making the transition to earning advanced degrees at highly selective graduate programs. Harvard, Columbia, Stanford, and Northwestern are just a few of the universities to which these students were admitted. Each of the essays contains designated segments highlighting the particular characteristics that make them outstanding admissions essays. Additionally, the essays are interspersed with segments labeled "Writer's Words of Wisdom," which contain statements from the author of the particular essay with advice on the admissions process. By offering guidance from successful graduate school applicants, readers can glean advice from a variety of perspectives, while still obtaining the critical information as it relates to well-written essays for programs within a variety of fields including law, business, medicine, education, and humanities.

Henry Petroski's previous bestsellers have delighted readers with intriguing stories about the engineering marvels around us, from the lowly pencil to the soaring suspension bridge. In this book, Petroski delves deeper into the mystery of invention, to explore what everyday artifacts and sophisticated networks can reveal about the way engineers solve problems. Engineering entails more than knowing the way things work. What do economics and ecology, aesthetics and ethics, have to do with the shape of a paper clip, the tab of a beverage can, the cabin design of a turbojet, or the course of a river? How do the idiosyncrasies of individual engineers, companies, and communities leave their mark on projects from Velcro® to fax machines to waterworks? Invention by Design offers an insider's look at these political and cultural dimensions of design and development, production and construction. Readers unfamiliar with engineering will find Petroski's enthusiasm contagious, whether the topic is the genesis of the Ziploc baggie or the averted collapse of Manhattan's sleekest skyscraper. And those who inhabit the world of engineering will discover insights to challenge their customary perspective, whether their work involves failure analysis, systems design, or public relations. Written with the flair that readers have come to expect from his books, Invention by Design reaffirms Petroski as the master explicator of the principles and processes that turn thoughts into the many things that define our made world.

Exploring the role of engineers in transforming and shaping the modern world, the author of *The Evolution of Useful Things* elucidates the principles of engineering as he looks at such achievements as the English Channel tunnel, the Panama Canal, and the Hoover Dam. Reprint. 15,000 first printing.

A powerful new theory of human nature suggests that our secret to success as a species is our unique friendliness “ Brilliant, eye-opening, and absolutely inspiring—and a riveting read. Hare and Woods have written the perfect book for our time. ” —Cass R. Sunstein, author of *How Change Happens* and co-author of *Nudge* For most of the approximately 300,000 years that *Homo sapiens* have existed, we have shared the planet with at least four other types of humans. All of these were smart, strong, and inventive. But around 50,000 years ago, *Homo sapiens* made a cognitive leap that gave us an edge over other species. What happened? Since Charles Darwin wrote about “ evolutionary fitness, ” the idea of fitness has been confused with physical strength, tactical brilliance, and aggression. In fact, what made us evolutionarily fit was a remarkable kind of friendliness, a virtuosic ability to coordinate and communicate with others that allowed us to achieve all the cultural and technical marvels in human history. Advancing what they call the “ self-domestication theory, ” Brian Hare, professor in the department of evolutionary anthropology and the Center for Cognitive Neuroscience at Duke University and his wife, Vanessa Woods, a research scientist and award-winning journalist, shed light on the mysterious leap in human cognition that allowed *Homo sapiens* to thrive. But this gift for friendliness came at a cost. Just as a mother bear is most dangerous around her cubs, we are at our most dangerous when someone we love is threatened by an “ outsider. ” The threatening outsider is demoted to sub-human, fair game for our worst instincts. Hare ’ s groundbreaking research, developed in close coordination with Richard Wrangham and Michael Tomasello, giants in the field of cognitive evolution, reveals that the same traits that make us the most tolerant species on the planet also make us the cruelest. *Survival of the Friendliest* offers us a new way to look at our cultural as well as cognitive evolution and sends a clear message: In order to survive and even to flourish, we need to expand our definition of who belongs.

Argues that failures in structural engineering are not necessarily due to the physical design of the structures, but instead a misunderstanding of how cultural and socioeconomic constraints would affect the structures.

From the students at the Yale Daily News, a book that highlights the essays that got students into Yale University, helping high school seniors get into the school of their choice The competition to get into a top-tier school becomes more and more fierce every year. Parents and students are searching for the best advice, and the final question they ask after joining clubs in high school and keeping the grades up is: How do I write a winning essay? *50 Yale Admission Success Stories and the Essays that Made Them Happen* shows college applicants how to do exactly that, showcasing the Common App essays that got students into Yale, in addition to Yale-specific application essays and other supplemental aspects of the Yale application, like short statements and short answers. But this book does more than just show students what kind of essays got college students through the door; it profiles each student who contributed to the collection and puts those essays into context. We meet Edgar Avina, a political science major from Houston who worked odd jobs to support his family, who immigrated from Mexico. Madeleine Bender, a New York City native, is a "jack of all trades" who writes for the Daily News, plays clarinet for a concert band, and majors in both Classics and Ecology & Evolutionary Biology. These profiles set this book apart from other college essay books, reminding students that in order to write a strong essay, you must be yourself and understand how the university you're applying to will help you make your greatest dreams into a reality.
