The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.

The definitive history of the Cold War and its impact around the world We tend to think of the Cold War as a bounded conflict: a clash of two superpowers, the United States and the Soviet Union, born out of the ashes of World War II and coming to a dramatic end with the collapse of the Soviet

Union. But in this major new work, Bancroft Prize-winning scholar Odd Arne Westad argues that the Cold War must be understood as a global ideological confrontation, with early roots in the Industrial Revolution and ongoing repercussions around the world. In *The Cold War*, Westad offers a new perspective on a century when great power rivalry and ideological battle transformed every corner of our globe. From Soweto to Hollywood, Hanoi, and Hamburg, young men and women felt they were fighting for the future of the world. The Cold War may have begun on the perimeters of Europe, but it had its deepest reverberations in Asia, Africa, and the Middle East, where nearly every community had to choose sides. And these choices continue to define economies and regimes across the world. Today, many regions are plagued with environmental threats, social divides, and ethnic conflicts that stem from this era. Its ideologies influence China, Russia, and the United States; Iraq and Afghanistan have been destroyed by the faith in purely military solutions that emerged from the Cold War. Stunning in its breadth and revelatory in its perspective, this book expands our understanding of the Cold War both geographically and chronologically, and offers an engaging new history of how today's world was created.

In keeping with the tenets of socialist internationalism, the political culture of the German Democratic Republic strongly emphasized solidarity with the non-white world: children sent telegrams to Angela Davis in prison, workers made contributions from their wages to relief efforts in Vietnam and Angola, and the deaths of Patrice Lumumba, Ho Chi Minh, and Martin Luther King, Jr. inspired public memorials. Despite their prominence, however, scholars have rarely examined such displays in detail. Through a series of illuminating historical investigations, this volume

deploys archival research, ethnography, and a variety of other interdisciplinary tools to explore the rhetoric and reality of East German internationalism.

Most communists, as any plains state patriot would have told you in the 1950s, lived in Los Angeles or New York City, not Minot, North Dakota. The Cold War as it played out across the Great Plains was not the Cold War of the American cities and coasts. Nor was it tempered much by midwestern isolationism, as common wisdom has it. In this book, David W. Mills offers an enlightening look at what most of the heartland was up to while America was united in its war on Reds. *Cold War in a Cold Land* adopts a regional perspective to develop a new understanding of a critical chapter in the nation's history. Marx himself had no hope that landholding farmers would rise up as communist revolutionaries. So it should come as no surprise that in places like South Dakota, where 70 percent of the population owned land and worked for themselves, people didn't take the threat of internal subversion very seriously. Mills plumbs the historical record to show how residents of the plains states—while deeply patriotic and supportive of the nation's foreign policy—responded less than enthusiastically to national anticommunist programs. Only South Dakota, for example, adopted a loyalty oath, and it was fervently opposed throughout the state. Only Montana, prodded by one state legislator, formed an investigation committee—one that never investigated anyone and was quickly disbanded. Plains state people were, however, “highly churched” and enthusiastically embraced federal attempts to use religion as a bulwark against atheistic communist ideology. Even more enthusiastic was the Great Plains response to the military buildup that accompanied Cold War politics, as the construction of airbases and missile

fields brought untold economic benefits to the region. A much-needed, nuanced account of how average citizens in middle America experienced Cold War politics and policies, *Cold War in a Cold Land* is a significant addition to the history of both the Cold War and the Great Plains.

There's only way to stop bioterrorism. Catch it before it spreads. Just one week after an entire town in Alaska mysteriously fell ill, all two hundred of them were dead. Six months ago a famous Russian virologist entered Seattle for a World Health Conference, but then he disappeared. Coincidence? The President of the United States doesn't think so, that's why he's sending in elite counterterrorism operative, Alexander King. King might not know anything about bioweapons, but he's an expert at stopping bad people from doing bad things. And if he doesn't get his man this time, millions of lives could be lost.
