IB Documents – Resources Repository
This is a resource I created for my HL students to practice for Paper 2 (Listening). They are based on 4 minute interviews with Trevor Noah and Chimamanda Ngozi Adichie so that they can practice their conceptual understanding (variance). I have attached the assessment as both PDF and Word, and the mark scheme is attached as well.

Clean energy and fuel storage are often required for both stationary and automotive applications. Some of these clean energy and fuel storage technologies currently under extensive research and development include hydrogen storage, direct electric storage, mechanical energy storage, solar–thermal energy storage, electrochemical (batteries and supercapacitors), and thermochemical storage. The gravimetric and volumetric storage capacity, energy storage density, power output, operating temperature and pressure, cycle life, recyclability, and cost of clean energy or fuel storage are some of the factors that govern efficient energy and fuel storage technologies for potential deployment in energy harvesting (solar and wind farms) stations and onboard vehicular transportation. This Special Issue thus serves the need for promoting exploratory research and development on clean energy and fuel storage technologies while addressing their challenges to practical and sustainable infrastructures.

Soil is an irreplaceable resource that sustains life on the planet, challenged by food and energy demands of an increasing population. Therefore, soil contamination constitutes a critical issue to be addressed if we are to secure the life quality of present and future generations. Integrated efforts from researchers and policy makers are required to develop sound risk assessment procedures, remediation strategies and sustainable soil management policies. Environmental Risk Assessment of Soil Contamination provides a wide depiction of current research in soil contamination and risk assessment, encompassing reviews and case studies on soil pollution by heavy metals and organic pollutants. The book introduces several innovative approaches for soil remediation and risk assessment, including advances in phytoremediation and implementation of metabolomics in soil sciences.

#1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly

Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

Developed with the IB for the new 2011 English A syllabus, this fully comprehensive course book is already used and loved in hundreds of schools worldwide. Containing unparalleled insight into IB assessment and fully covering language in cultural contexts, it will concretely equip your students to tackle the course and assessments.

What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain’s virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

The best-selling introduction to evidence-based medicine In a clear and engaging style, How to Read a Paper demystifies evidence-based medicine and explains how to critically appraise published research and also put the findings into practice. An ideal introduction to evidence-based medicine, How to Read a Paper explains what to look for in different types of papers and how best to evaluate the literature and then implement the findings in an evidence-based, patient-centred way. Helpful checklist summaries of the key points in each chapter provide a useful framework for applying the principles of evidence-based medicine in everyday practice. This fifth edition has been fully updated with new examples and references to reflect recent developments and current practice. It also includes two new chapters on applying evidence-based medicine with patients and on the common criticisms of evidence-based medicine and responses. How to Read a Paper is a standard text for medical and nursing schools as well as a friendly guide for everyone wanting to teach or learn the basics of evidence-based medicine.

NEW YORK TIMES BESTSELLER • A worthy heir to Isak Dinesen and Beryl Markham, Alexandra Fuller shares visceral memories of her childhood in Africa, and of her headstrong, unforgettable mother. “This is not a book you read just once, but a tale of terrible beauty to get lost in over and over.”—Newsweek “By turns mischievous and openhearted, earthy and soaring . . . hair-raising, horrific, and thrilling.”—The New Yorker Though it is a diary of an unruly life in an often inhospitable place, Don’t Let’s Go to the Dogs Tonight is suffused with Fuller’s endearing ability to find laughter, even when there is little to celebrate. Fuller’s debut is unsentimental and unflinching but always captivating. In wry and sometimes hilarious prose, she stares down disaster and looks back with rage and love at the life of an extraordinary family in an extraordinary time. From 1972 to 1990, Alexandra Fuller—known to friends and family as Bobo—grew up on several farms in southern and central Africa. Her father joined up on the side of the white government in the Rhodesian civil war, and was often away fighting against the powerful black guerilla factions. Her mother, in turn, flung herself at their African life and its rugged farm work with the same passion and maniacal energy she brought to everything else. Though she loved her children, she was no hand-holder and had little tolerance for neediness. She nurtured her daughters in other ways: She taught them, by example, to be resilient and self-sufficient, to have strong wills and strong opinions, and to embrace life wholeheartedly, despite and because of difficult circumstances. And she instilled in Bobo, particularly, a love of reading and of storytelling that proved to be her salvation. Alexandra Fuller writes poignantly about a girl becoming a woman and a writer against a backdrop of unrest, not just in her country but in her home. But Don’t Let’s Go to the Dogs Tonight is more than a survivor’s story. It is the story of one woman’s unbreakable bond with a continent and the people who inhabit it, a portrait lovingly realized and deeply felt. Praise for Don’t Let’s Go to the Dogs Tonight “Riveting

. . . [full of] humor and compassion."—O: The Oprah Magazine "The incredible story of an incredible childhood."—The Providence Journal

Wise, often funny, sometimes heartbreaking, *Persepolis: The Story of a Childhood* /tells the story of Marjane Satrapi's life in Tehran from the ages of six to fourteen, years that saw the overthrow of the Shah's regime, the triumph of the Islamic Revolution and the devastating effects of war with Iraq.
