Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Give your students the tools they need to write a great research paper with this handbook from The Literacy Essential Series. How to Write a Great Research Paper guides students step-by-step through the research process. Each step is carefully explained, and the handbook includes helpful practice activities, as well as appropriate examples taken from research papers written by middle school students. Don't let the process of writing a research paper overwhelm your students—watch them become confident writers and thinkers with this new edition of How to Write a Great Research Paper.

What if writing scientific papers was faster, easier, and a bit less painful? This book provides a step-by-step, top-down approach that makes it easier to turn your hard-won results into research papers that your fellow scientists want to read and cite. "I just wrote a (rough) first draft of a paper during a 3-hour flight, and if it wasn't for these teachings, this would have taken me days (if not weeks)!" -Talayeh Aledavood, James S. McDonnell Postdoctoral Fellow, University of Helsinki The book's systematic approach builds on what I've learned through coauthoring close to 100 research papers with students. You'll learn how to outline your paper from top to down, how to develop your story, and how to think about what to write before you write it. You'll also learn how to deal with many issues that writers of science commonly face, from the fear of the blank page to dealing with critical reviews. Here's what you get: A complete step-by-step plan for writing a scientific paper, from choosing which results to include to wrapping up the paper in the Discussion section Concrete, actionable, and practical advice, from a paragraph-level template for the Introduction to guidance on preparing plots and figures Lots of writing tips, from placing signposts in your text to shortening and straightening your sentences This book has been written for the PhD student who is aiming to write a journal article on her research results, but it should also be useful to any scientist who has ever found writing difficult. Whatever the stage of your career, if you'd like to learn how to write research papers systematically and efficiently, this is the book for you! The book includes: PART I: STORY 1. How To Choose The Key Point Of Your Paper 2. How To Choose The Supporting Results 3. How To Write The Abstract 4. How To Choose The Title PART II: OUTLINE 5. The Power Of Outlining 6. How To Write The Introduction, Part I: Structure 7. How To Write The Introduction, Part II: A Four-Paragraph Template 8. How To Write The Introduction, Part III: The Lede 9. How To Write The Materials And Methods 10. How To Write The Results, Part I: Figures 11. How To Write The Results, Part II: Text 12. How To Write The Discussion PART III: WORDS 13. How Does Your Reader Read? 14. How To Write Your First Draft 15. How To Edit Your First Draft 16. Tips For Revising Content And Structure 17. Tips For Editing Sentences PART IV: ITS NOT OVER YET 18. How To Write The Cover Letter 19. How To Deal With Reviews About the author I am a professor of computational science and an experienced academic with around 100 published papers. My research is interdisciplinary, to say the least: I have studied the social fabric of smartphone users, the genetic structure of ant supercolonies, the connectome of the human brain, networks of public transport, and the molecular biology of the human immune system, to name a few. So one could say that I have a broad range of scientific interests (or that I simply cannot choose). But that's exactly the way I like it!

Do less reading and more writing! This workbook was designed to get you writing your research articles and publishing in peer-reviewed journals right now. With this workbook, you will actually write as you read. Each chapter ends with a summary of impoant points and fill-in exercises that will lead you write a complete draft of your research article. This book was written by a scientist for scientists. Dr. Luz Claudio understands the pressures of academia and the need for all scientists to publish or perish. With over 25 years of experience teaching and mentoring students at all educational levels, she has distilled the essential and practical knowledge you need to succeed in becoming a published scientist. If you are a graduate student, postdoctoral fellow, junior faculty, physician affiliated with an academic institution, a government researcher, a leader of a community-based organization or a principal investigator mentoring future scientists, you need this guide. The workbook can be used on its own or as a companion to the online course: WriteScienceNow.com

Designed to give the student every tool necessary to write a first-rate high school or college research paper or thesis, this unique guide offers complete coverage of all the important elements involved.
