For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have

"Goodness, Abdication really is good. I'm in awe of Juliet's ability" (Jessica Fellowes, New York Times bestselling author of The World of Downton Abbey). England, 1936. A beloved king is dead, and by year's end, the charismatic new monarch will give up his throne for love. The world is on the brink of war. And in the tumultuous intervening months, three outsiders will find themselves embroiled in the hidden truths, undeclared loves, unspoken sympathies, and covert complicities of a glittering high society in the throes of upheaval. After a long journey

from her home in Barbados, May Thomas secures a position as a secretary and driver and opens her heart to a man seemingly beyond her reach. Outwardly affable American spinster Evangeline Nettlefold finds her place in the uppermost social circles, but her growing resentment toward her childhood friend Wallis Simpson predicts disaster. A friendship catapults Julian Richardson from his mother's middle-class parlor to luxurious dinners with the king, yet he cannot forget those who struggle outside the gilded gates, nor his uneasy affection for May. As addictive as Downton Abbey, as poignant as The Remains of

Ralls' Introduction to Materials Science and Engineering is intended for students who want to learn about the nature of solid substances and, especially, for beginning engineering students who are making their first serious contact with the structure and properties of real solids. It represents, clearly and

logically, the chemical and physical principles on which the properties of materials depend. The basic relationships introduced in general chemistry and physics courses are reviewed and extended in order to permit the student to relate the properties of ceramic, metallic, and polymeric solids to their internal structure and external environment.
