For courses in digital circuits, digital systems (including design and analysis), digital fundamentals, digital logic, and introduction to computers Digital Fundamentals, Eleventh Edition, continues its long and respected tradition of offering students a

Teaching fundamental design concepts and the challenges of emerging technology, this textbook prepares students for a career designing the computer systems of the future. In-depth coverage of complexity, power, reliability and performance, coupled with treatment of parallelism at all levels, including ILP and TLP, provides the state-of-the-art training that students need. The whole gamut of parallel architecture design options is explained, from core microarchitecture to chip multiprocessors to large-scale multiprocessor systems. All the chapters are self-contained, yet concise enough that the material can be taught in a single semester, making it perfect for use in senior undergraduate and graduate computer architecture courses. The book is also teeming with practical examples to aid the learning process, showing concrete applications of definitions. With simple models and codes used throughout, all material is made open to a broad range of computer engineering/science students with only a basic knowledge of hardware and software.

Informative text and hundreds of photos are a fitting testament to the world-renowned Rolex brand. Respected wristwatch expert and historian Gisbert L. Brunner shares his extensive subject knowledge once more. A must-have for watch collectors, enthusiasts, and anyone wishing to become one.

Grand Complications, Volume III provides a detailed overview of complicated watchmaking. Published by Tourbillon International, this reference work for connoisseurs deals with each of the major horological complications by theme, from their history through to their most recent developments. Multi-complications, minute repeaters and sonneries, tourbillons, equations of time, perpetual calendars, chronographs, jump hours and retrograde mechanisms, and GMTs and multiple time zones are reviewed in great detail. The latest creations by over 23 elite watch manufacturers are displayed and are accompanied by technical descriptions, comprising more than 400 pages in a book that already has earned respect among connoisseurs.

Cambridge Low Price Editions are reprints of internationally respected books from Cambridge University Press. Advanced Chemistry covers the syllabuses of all the main examining boards offering A-level chemistry, and contains material suitable for students beginning undergraduate study. The author places the subject in context by discussing the nature and the wider implications and applications of chemistry. The material is divided into four parts: physical, industrial, inorganic and organic chemistry. Each part is divided into short self-contained units, each of which develops a set of well-defined themes or concepts. Students may work through the units in order, or individual units

What would road rage in Beverly Hills look like? From the whimsical perspective of *The Other Coast* creator Adrian Raeside, it would involve a prim-and-proper hurling of a jar of Grey Poupon at the offending driver. *The Other Coast: Road Rage in Beverly Hills* is the first collection of Adrian Raeside's strip featuring his off-kilter view of contemporary life. Raeside's lighthearted look at culture, politics, fashion, society, and life in general is both insightful and hilarious. Whether it's taking a clever poke at our obsession with wireless phones, our inability to maintain a workout program, or the witty banter of married life, *The Other Coast* is a bastion of original thinking, wry wit, and out-loud laughs. Much of the humor comes at the expense of Toulouse, the eccentric screenwriter, and his cause-seeking wife, Vicki. But the strip also features a colorful cast of repair people, kids, contractors, tech-support goons, agents, pets, and much more. Those enjoying strips that provide more than the "same ol' schtick" are sure to relish a visit to *The Other Coast*, where folks aren't deep enough to be shallow.
