With ever-expanding knowledge and advances in medicine, the sixth edition of this book is significantly revised and presented in new full-colour format. Structured in question-answer format, this book is a must-have for all undergraduate medical students as it prepares them for both theory and viva-voce examinations. It is also useful for dentistry and nursing students.

- Thorough revision of all the chapters without changing basic framework to keep up with the latest changes in the field of medicine.
- Revision of topics especially respiratory system, immunological factors in disease, diseases of the cardiovascular system, diseases of the gastrointestinal system, acute poisoning and environmental emergencies, oncology, diseases of the kidneys and genitourinary system, diseases due to infections, endocrine and metabolic diseases.
- Presentation of text pointwise with suitable boxes and tables, which helps the student in quick learning and revision.
- Addition of newer innovations and treatments modalities.
- Inclusion of clinical decision pathways for some of the commonly encountered critical and non-emergent disease conditions
- Expansion of normal values of investigations and understanding the evolution of disease.
- Management of acute medical emergencies like acute myocardial infarction, acute pulmonary oedema, acute anaphylactic and hypovolumic shock, status asthmaticus, tension pneumothorax, status epilepticus, haemoptysis, gastrointestinal bleeding, diabetic coma, snake bites, common poisoning, etc.
- Emphasis has been laid on clinical presentation with description of the drugs. New to this Edition
- Addition of many new line diagrams, tables, flowcharts to facilitate greater retention of knowledge.
- Updates on Zika, Ebola, Nipah, sepsis, monoclonal antibodies, adult immunisation, paracetamol poisoning, acute radiation syndrome, myelodysplastic syndrome, lymphoid malignancies, influenza, tuberculosis, human immunodeficiency virus infection, hepatitis B and C, heart failure, rheumatic fever, pulmonary hypertension and hyperlipidaemia.

Additional Feature • Complimentary access to full e-book

The new edition of this revision manual provides students with the latest advances and information in medicine. Divided into 25 chapters, the text covers the diagnosis and management of diseases and disorders in all medical subspecialties. The second edition has been fully revised and features new topics including recent advances, new drugs, geriatrics, and immunology. Disease aetiology, diagnostic procedures, radiological investigations and basics of ECG readings are discussed in depth. Important clinical examination-oriented questions are included in each section, with key points emphasised to assist revision. The comprehensive text is highly illustrated with clinical photographs and diagrams. Important management techniques are highlighted in coloured tables. Key points

Comprehensive revision manual covering all medical subspecialties for undergraduates Fully revised, second edition featuring many new topics Includes clinical examination-oriented questions to assist revision Previous edition (9789386056610) published in 2016

The four-volume set LNCS 8513-8516 constitutes the refereed proceedings of the 8th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 14 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 75 papers included in this volume are organized in the following topical sections: design for aging; health and rehabilitation applications; accessible smart and assistive environments; assistive robots and mobility, navigation and safety.

This book constitutes the refereed conference proceedings of the 10th International Conference on Advances in Computer Entertainment, ACE 2013, held in Boekelo, The Netherlands, in November 2013. The 19 full paper and 16 short papers presented together 42 extended abstracts were carefully reviewed and selected from a total of 133 submissions in all categories. The papers cover topics across a wide spectrum of disciplines including new devices; evaluation and user studies; games as interface to serious applications; creating immersion; interfaces; new experiences; procedural approaches and AI; and theory. Focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications.

Unlock the secrets and share in the knowledge that has educated generations of Jedi—from the history and hierarchy of the Jedi Order to the mastery of the Force and the nuances of lightsaber combat. Handed down from Master to Padawan, each Jedi who has held and studied this copy has annotated the pages—adding his or her personal experiences and lessons they 've learned. This copy is now passed to you.
