Raymond Noe's Employee Training and Development sets the standard in this course area. First introduced in 1998, ETD became the market-defining text within 6 months of publication. Its popularity is due to its lively writing style and relevant examples of the most up-to-date developments in training, research and practice, including the strategic role of training and the use of new technologies in training. Employee Training and Development strikes a balance between research and real company practices. It provides students with a solid background in the fundamentals of training and

Development such as needs assessment, transfer of training, learning environment design, methods, and evaluation. To help students better understand the relationship between the main elements of the book, the book is now organized into five different parts. Part I focuses on the context for training and development and includes a chapter devoted to strategic training. Part II includes coverage related to the fundamentals of designing training programs. Chapters in Part II focus on needs assessment, learning theories and program design, transfer of training, and training evaluation. Part III focuses on training and development methods and includes chapters devoted to traditional

Development Program and the use of technology in training, employee development, and special issues in employee development, such as managing diversity, succession planning, and cross-cultural preparation. Chapters in Part IV cover career issues and how companies manage careers, as well as challenges in career management, such as dealing with work-life conflict, retirement, and socialization. Finally, Part V provides a look at the future of training and development.

Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of

its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting "I feel happy! I feel terrific!" Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid

Scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the

training. The demands of technological change, growing need for pilots at a time when the pool of experienced applicants is diminishing, and growing recognition of the importance of Human Factors to aviation safety, are straining the ability to cope. There is a growing recognition by management, of the contribution of ground and airborne instruction to the efficient operation of aviation in a variety of contexts. This book shows how professionals in the aviation industry and academic researchers complement each other in their pursuit of more effective and efficient flight training and instruction. Theory and practice each have a contribution to make. The contributions are thus drawn from
