Loudoun County Public Schools / Overview

The Middle East in Modern World History focuses on the history of this region over the past 200 years. It examines how global trends during this period shaped the Middle East and how these trends were affected by the region's development. Three trends from the past two centuries are highlighted: The region as a strategic conduit between East and West The development of the region's natural resources, especially oil The impact of a rapidly globalizing world economy on the Middle East

A critical reading of both literary and non-literary German texts published between 1490 and 1540 exposes a populist backlash against perceived social and political disruptions, the dramatic expansion of spatial and epistemological horizons, and the growth of global trade networks. These texts opposed the twin phenomena of pluralization and secularization, which promoted a Humanist tolerance for ambiguity, boosted globalization and spatial expansion around 1500, and promoted new ways of imagining the world. Part I considers threats to the political order and the protestations against them, above all a vigorous defense of the common good. Part II traces the intellectual and epistemological upheaval triggered by the spatial discoveries and the new methods of visual and verbal representation of space. Part III examines the nationalistic backlash triggered by the rising global trade and related abusive trading practices and by perceived undue foreign influences. It is the basic premise of this book that the texts examined here protested the observed disruptions of the status quo and sought to reestablish a stable imperial order in the face of political and social upheaval and of the felt cultural decline of the German nation.

Explores the development of natural history since the Renaissance and contextualizes current discussions of biodiversity.

In *The Better Angels of Our Nature* Harvard psychologist Steven Pinker argued that modern history has witnessed a dramatic decline in human violence of every kind, and that in the present we are experiencing the most peaceful time in human history. But what do top historians think about Pinker's reading of the past? Does his argument stand up to historical analysis? In *The Darker Angels of our Nature*, seventeen scholars of international stature evaluate Pinker's arguments and find them lacking. Studying the history of violence from Japan and Russia to Native America, Medieval England and the Imperial Middle East, these scholars debunk the myth of non-violent modernity. Asserting that the real story of human violence is richer, more interesting and incomparably more complex than Pinker's sweeping, simplified narrative, this book tests, and bests, 'fake history' with expert knowledge.

In August of 1920, women's suffrage in America came down to the vote in Tennessee. If the Tennessee legislature approved the 19th amendment it would be ratified, giving all American women the right to vote. The historic moment came down to a single vote and the voter who tipped the scale toward equality did so because of a powerful letter his mother, Febb Burn, had written him urging him to "Vote for suffrage and don't forget to be a good boy." *The Voice That Won the Vote* is the story of Febb, her son Harry, and the letter that gave all American women a voice.
