The New Look strategy decreased expenditures for the army and navy in favour of increased expenditures for the air force and for nuclear weaponry. The policy, which relied heavily on the capacity for strategic bombing, depended on the asymmetrical threat to respond to provocations by the Soviet Union with massive retaliation. It also stated that the nature, location, and timing of such a response would be chosen by the United States.

The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 27 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. This report serves as a primer on the EU. It also discusses U.S.-EU relations

Data integrity is a critical aspect to the design, implementation, and usage of any system which stores, processes, or retrieves data. The overall intent of any data integrity technique is the same: ensure data is recorded exactly as intended and, upon later retrieval, ensure the data is the same as it was when originally recorded. Any alternation to the data is then traced to the person who made the modification. The integrity of data in a patient's electronic health record is critical to ensuring the safety of the patient. This book is relevant to production systems and quality control systems associated with the manufacture of pharmaceuticals and medical device products and updates the practical information to enable better understanding of the controls applicable to e-records. The book highlights the e-records suitability implementation and associated risk-assessed controls, and e-records handling. The book also provides updated regulatory standards from global regulatory organizations such as MHRA, Medicines and Healthcare Products Regulatory Agency (UK); FDA, Food and Drug Administration (US); National Medical Products Association (China); TGA, Therapeutic Goods Administration (Australia); SIMGP, Russia State Institute of Medicines and Good Practices; and the World Health Organization, to name a few.

Between 1492 and 1914, Europeans conquered 84 percent of the globe. But why did Europe establish global dominance, when for centuries the Chinese, Japanese, Ottomans, and South Asians were far more advanced? In *Why Did Europe Conquer the World?*, Philip Hoffman demonstrates that conventional explanations—such as geography, epidemic disease, and the Industrial Revolution—fail to provide answers. Arguing instead for the pivotal role of economic and political history, Hoffman shows that if certain variables had been different, Europe would have been eclipsed, and another power could have become master of the world. Hoffman sheds light on the two millennia of economic, political, and historical changes that set European states on a distinctive path of development, military rivalry, and war. This resulted in astonishingly rapid growth in Europe's military sector, and produced an insurmountable lead in gunpowder technology. The consequences determined which states established colonial empires or ran the slave trade, and even which economies were the first to industrialize. Debunking traditional arguments, *Why Did Europe Conquer the World?* reveals the startling reasons behind Europe's historic global supremacy.

This two-volume collection of articles on European migration during the 19th and 20th centuries examines the motivations for migration, drawing on the particular experience of Irish, German, Scottish, Italian, Scandinavian and other European migrants, as well as those who migrated to Europe, such as West Indian migrants into Britain. The first volume examines the hostility faced by migrants, both in their home countries and their countries of destination. The second volume considers the contributions migrants have made to their host countries, and compares the experiences of different migrant groups. In addition, the continuing links between migrants and their countries of origin is explored through a series of essays and papers. Altogether there are 51 articles, dating from 1950 to 1994.

Before the latest EU enlargement, substantial changes in the integration process were predicted as a result of the accession of 10 new Member States, with some forecasting cataclysmic consequences. This book, one of the first ex post assessments of EU enlargement, provides evidence to the contrary, while also providing examples in which the new Members have been able to influence EU policy output with their liberal attitudes on economic and social policy.
