The overwhelming majority of a software system's lifespan is spent in use, not in design or implementation. So, why does conventional

Online Library Operating Engineers 75th 6 Flags

wisdom insist that software engineers focus primarily on the design and development of large-scale computing systems? In this collection of essays and articles, key members of Google's Site Reliability Team explain how

Online Library Operating Engineers 75th 6 Flags

and why their commitment to the entire lifecycle has enabled the company to successfully build, deploy, monitor, and maintain some of the largest software systems in the world. You'll learn the principles and

Online Library Operating Engineers 75th 6 Flags

describes the role of military engineers, especially the U.S. Army Corps of Engineers, in the Vietnam War. It is a story of the engineers' battle against an elusive and determined enemy in one of

Online Library Operating Engineers 75th 6 Flags

the harshest underdeveloped
regions of the world.

Despite these challenges,
engineer soldiers
successfully carried out
their combat and
construction missions. The
building effort in South

Online Library Operating Engineers 75th 6 Flags

Vietnam allowed the United States to deploy and operate a modern 500,000-man force in a far-off region.

Although the engineers faced huge construction tasks, they were always ready to support the combat troops.

Online Library Operating Engineers 75th 6 Flags

They built ports and depots,
carved airfields and
airstrips out of jungle and
mountain plateaus, repaired
roads and bridges, and
constructed bases. Because
of these efforts, ground
combat troops with their

Online Library Operating Engineers 75th 6 Flags

supporting engineers were able to fight the enemy from well-established bases.

Although most of the construction was temporary, more durable facilities, such as airfields, port and depot complexes,

Online Library Operating Engineers 75th 6 Flags

headquarters buildings,
communications facilities,
and an improved highway
system, were intended to
serve as economic assets for
South Vietnam. This volume
covers how the engineers
grew from a few advisory

Online Library Operating Engineers 75th 6 Flags

detachments to a force of more than 10 percent of the Army troops serving in South Vietnam. The 35th Engineer Group began arriving in large numbers in June 1965 to begin transforming Cam Ranh Bay into a major port,

Online Library Operating Engineers 75th 6 Flags

airfield, and depot complex. Within a few years, the Army engineers had expanded to a command, two brigades, six groups, twenty-eight construction and combat battalions, and many smaller units. Other products
