and prosper without them". --- Luszez and Kleiner, 2001 The most important corporate resource over the next few years will be talent: smart, sophisticated business people who are technologically literate, globally astute, and operationally agile. And even as the demand for talent goes up, the supply of it will be going down. This seems to particularly hold true in case of the IT-ITES (Information Technology and Information Technology- Enabled Services) industry in India which requires high quality and highly skilled labour force to cater to the rapidly increasing global demand for software

services but is currently facing an increasing shortage of skills supply. Moreover, due to shortages of skilled workers, high turnover rates, and rapid business growth in the service sectors, it has been noted that recruiting, selecting, and placing applicants are among the top three priorities of human resource professionals. Since the IT industry in India is faced with these three challenges, recruitment and selection comprises an important human resource practice in this industry. Further, in this industry, human resources comprise both the raw material and

the 'technology', and are therefore of prime importance. As India completes the transition from being an agrarian economy to being a full-fledged, first-world economy, operating at the leading edge of contemporary technology, the IT sector is emerging as major driver of the economy. The Indian IT industry comprises of domestic software and services firms as well as foreign firms looking to consolidate their presence in India owing to the increasing cost pressures in US and Europe. This has increased the need to setup in-house development centers or outsource to third-party service providers in

ITES professionals in India by the year 2012 and demand will out-pace the supply. Though the Indian IT industry is in a strong position to leverage this global software opportunity (as India currently has one of the world's largest, most qualified pools of scientific and engineering manpower), this growing global demand is not only for numbers but also for appropriately skilled, industry-oriented professionals as companies are further scaling their operations and offering high value-added services which involve higher levels of technology and more specialized, higher-end services. Hence,

firms which want to maintain their competitive advantage have to carefully recruit and select the most suitable out of the large pool of available manpower. Moreover, according to a recent study by McKinsey & Co., although the potential supply of talent in low wage countries such as India is large and growing rapidly, only a fraction of the job candidates could successfully work at a foreign company on account of their limited suitability i.e. though there are many candidates with the technical skills to fill a position, they may not have the cultural skills to “fit in” with the

A New York Times, USA Today, and Wall Street Journal bestseller In this iconic bestseller, popular business blogger and bestselling author Seth Godin proves that winners are really just the best quitters. Godin shows that winners quit fast, quit often, and quit without guilt—until they commit to beating the right Dip. Every new project (or job, or hobby, or company) starts out fun...then gets really hard, and not much fun at all. You

might be in a Dip—a temporary setback that will get better if you keep pushing. But maybe it's really a Cul-de-Sac—a total dead end. What really sets superstars apart is the ability to tell the two apart. Winners seek out the Dip. They realize that the bigger the barrier, the bigger the reward for getting past it. If you can beat the Dip to be the best, you'll earn profits, glory, and long-term security. Whether you're an intern or a CEO, this fun little book will help you figure out if you're in a Dip that's worthy of your time, effort, and talents. The old saying is wrong—winners do quit, and quitters

Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to

be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way,

What will the future be? A dystopian landscape controlled by machines or a brave new world full of possibilities? Perhaps the answer lies with Artificial Intelligence (AI)—a phenomenon much beyond technology that has, continues to, and will shape lives in ways we do not understand yet. This book traces the evolution of AI in contemporary

history. It analyses how AI is primarily being driven by "capital" as the only "factor of production" and its consequences for the global political economy. It further explores the dystopian prospect of mass unemployment by AI and takes up the ethical aspects of AI and its possible use in undermining natural and fundamental rights. A tract for the times, this volume will be a major intervention in an area that is heavily debated but rarely understood. It will be essential reading for researchers and students of digital humanities, politics, economics, science and technology studies,
